1. Request Specification

Query / Prompt: "Identify any noticeable infrastructure features in this satellite scene."

2. Factual Findings & Observations

Finding 1 (internvl3_finding): The image shows a green background with a large blue circle and a smaller gray square. There are no visible infrastructure features such as buildings, roads, or other man-made structures in this satellite scene.

3. Operational Boundaries & Limitations

- Observations are generated based on local hardware inference (RTX 5060 Laptop GPU).
- ChangeFormer outputs represent 2D building change masks trained on LEVIR-CD.
- UPerNet semantic segmentation reflects generic ADE20K demo proxy classes unless domain-trained.
- Satellite pixel coordinates are not mapped to geographic bounds unless explicit CRS metadata is verified.
- Analyst confirmation is recommended prior to operational deployment.
