

SatQuery AI — Geospatial Analysis Report

Remote Sensing Intelligence & Multimodal Evidence Verification

Job ID:	8aac9ae0-1062-45ff-bcc2-6b6c36453703
Project ID:	e64343dc-4fb3-41c3-ac45-61635ae3beaf
Task Type:	INTERNVL3
Status:	RUNNING
Generated:	2026-09-26 11:02:39 UTC

1. Request Specification

Query / Prompt: "What geometric shapes and colors are present in this satellite scene?"

2. Factual Findings & Observations

Finding 1 (internvl3_finding): The image features a green background with a large blue circle and a smaller gray square.

Measurements: protocol_version: 1.0, success: True, job_id: 4d34e034-db30-4d50-8e6c-50d19ef6a0fa, step_key: internvl_vqa, attempt_id: 1, output_assets: {}, output_metadata: {'answer': 'The image features a green background with a large blue circle and a smaller gray square.', 'prompt': 'What geometric shapes and colors are present in this satellite scene?', 'model': 'InternVL3-2B', 'max_tokens': 512}, metrics: {'duration_ms': 3402.834415435791, 'peak_vram_mb': 4073.62255859375, 'peak_ram_mb': None, 'device_name': 'cuda', 'cudnn_enabled': False}, error_code: None, error_message: None

3. Operational Boundaries & Limitations

- Observations are generated based on local hardware inference (RTX 5060 Laptop GPU).
- ChangeFormer outputs represent 2D building change masks trained on LEVIR-CD.
- UPerNet semantic segmentation reflects generic ADE20K demo proxy classes unless domain-trained.
- Satellite pixel coordinates are not mapped to geographic bounds unless explicit CRS metadata is verified.
- Analyst confirmation is recommended prior to operational deployment.
