

SatQuery AI — Geospatial Analysis Report

Remote Sensing Intelligence & Multimodal Evidence Verification

Job ID:	job-rep-1
Project ID:	proj-1
Task Type:	BITEMPORAL_CHANGE
Status:	SUCCEEDED
Generated:	2026-09-26 14:32:14 UTC

1. Request Specification

Query / Prompt: "Analyze building changes between Scene A and Scene B."

2. Factual Findings & Observations

Finding 1 (change_detection_summary): Sample observation for report testing.

Measurements: change_percentage: 5.2

3. Operational Boundaries & Limitations

- Observations are generated based on local hardware inference (RTX 5060 Laptop GPU).
- ChangeFormer outputs represent 2D building change masks trained on LEVIR-CD.
- UPerNet semantic segmentation reflects generic ADE20K demo proxy classes unless domain-trained.
- Satellite pixel coordinates are not mapped to geographic bounds unless explicit CRS metadata is verified.
- Analyst confirmation is recommended prior to operational deployment.
