## 1. Request Specification

Query / Prompt: "Analyze building changes between Scene A and Scene B."

## 2. Factual Findings & Observations

Finding 1 (change\_detection\_summary): Sample observation for report testing.

Measurements: change\_percentage: 5.2

## 3. Operational Boundaries & Limitations

- Observations are generated based on local hardware inference (RTX 5060 Laptop GPU).
- ChangeFormer outputs represent 2D building change masks trained on LEVIR-CD.
- UPerNet semantic segmentation reflects generic ADE20K demo proxy classes unless domain-trained.
- Satellite pixel coordinates are not mapped to geographic bounds unless explicit CRS metadata is verified.
- Analyst confirmation is recommended prior to operational deployment.
